

A unique facility for visitors, a factory combined with a corporate museum, was launched in Kobe in 1988. Glicopia was also opened in Chiba in 2017. Not only taking a closer look at the manufacturing processes of Papico and Seventeen ice, visitors are also provided with an explanation for the whole process on how our products are manufactured with cutting edge technology, and how it is delivered to our customers, through observing and experiencing. Also, visitors will have fun learning about ice cream watching a video "How ice cream is made." We hope you will enjoy your visit to "Glicopia CHIBA, an exciting facility for visitors"

 Arrival of a Charming Communication Museum

Exciting Factory

# glicopia

## CHIBA

*Glico*

A state-of-the-art and charming factory that only Glico can provide. An entertainment factory that can be visited, studied and enjoyed.

### Freezing Experience

Enter the freezer to experience how cold it is.

### Theater Room

Showing The Tale of Founder Ri-ichi Ezaki and The Making of Ice-Cream.

The gigantic Goal-In logo is there to greet you!

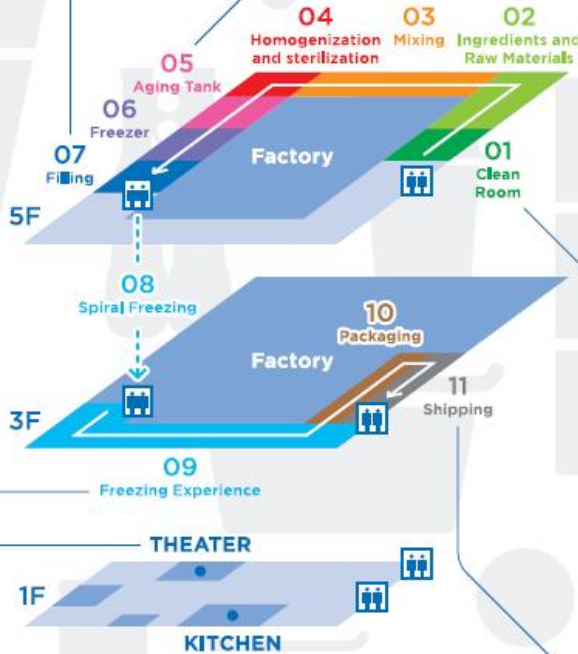

Operate the cameras to observe the factory.

Use the cameras to zoom in and watch the filling process up close.

### Aging Tank

Experience the scale of the enormous aging tank first-hand. Try this mysterious experience for yourself!

### Clean Room

The air showers remove dust and little scraps of trash from your body.

### Shipping

The hygiene management initiatives adopted by Glico through whole manufacturing process until shipping.

### Hands-on experience (fee charged)

Enables participants to create their own original ice-cream.
